

The start to the WDC council meeting on July 25 was the pits; it was the worst display of human relations I have ever seen.

Not since a previous mayor publicly chastised Cr Chery! Mai have I been so ashamed of council. Shame on you mayor, councillors and CEO — you were all complicit in an orchestrated demonising of a passionate and caring member of the public.

Having the pre-prepared document with all the clauses for chamber behaviour smelt of a set up; coming from a civic leader, this was the pits.

By your actions shall ye be judged, shame on you council, you created the "Them and Us Culture".

As community leaders the responsibility of creating outstanding communications and relationship with the community is squarely in your court.

You have failed miserably, and not one of you had the guts to say, "It's Not OK!"

I wish that Channel North had recorded the whole event to show the public your true colours.

You have a written code of conduct to which you expect others to abide by but exempt yourself from its rules.

How many other members of the public have you bullied over the years that the public does not get to hear about?

"IT'S NOT OK!"
